

# SLIP SIMULATOR TRAINING

In 2016, 849 fatalities due to slips, trips, and falls were recorded in the United States. HAMMER's Slip Simulator helps prevent serious falls which cost employers an average of \$28,000 and cause employees to miss an average of 31 days of work per year.

- Reduces the occurrences of slips and falls by up to 70%
- Provides safe kinesthetic learning opportunities for students
- Equips students with lifelong tools to identify hazards and reduce risks
- Helps avoid costs and days away from work

Slip Simulator training protects workers from one of the most common forms of serious injury. HAMMER's Slip Simulator training allows students to learn proper techniques for walking on slippery surfaces in a safe, controlled environment.

Students engage in kinesthetic training activities to improve stability and reduce the occurrence of slips and falls by up to 70 percent.

The simulator offers an effective way to ensure workers receive memorable and potentially lifesaving training.

*—Training as Real as it Gets!—*
